Objectives

In the present age, large sections of youth generation are in stress due to unemployment. This is a big concern for both educated as well as non-educated communities. As a result, population density underneath the poverty lines increases, which not only affect the economic base but also has adverse effect on the socio-economic structure of our society. In such a situation, the Dept. of Chemistry is trying to encourage our students to become an Entrepreneur by set-up their own manufacturing and marketing unit to establish themselves as a contributing part to make a healthy civilization by the ways:

- Create positive mental attitude to achieve goal.
- Taking responsibility for socio economic development through create job opportunity for others. .
- Generate innovative ideas that provides new products, marketing, improve the quality of goods, etc
- Increase Standard of Living by increasing the consumption of various goods and services by a household through increase the economic condition which in deed changes the society and promote facilities like higher expenditure on different sectors like education, health and sanitation, home ownership etc.

Course outcome:

On successful completion of the course the students will be able to:

Set-up own small scale manufacturing unit for the domestic essentials and develop sustainable entrepreneurship.

May have job opportunities in different sectors of Chemical and Pharmaceutical industries, like quality control, Research and development, marketing etc.

provides critical thinking skills and confident to achieve goals.

Gain the knowledge about manufacturing industries which will help to get job opportunities in other industrial sectors.

Learned to calculate costing and sale price of manufactured material.
