Certificate Course On Data Analysis With MS-Excel

Data analysis with Microsoft Excel is a versatile and widely used approach to derive insights from data. MS-Excel provides a user-friendly interface for tasks like importing, cleaning, and visualizing data. With its functions and formulas, one can perform calculations and manipulate data efficiently. Excel's charting capabilities aid in creating meaningful visual representations of data, and advanced features like Pivot Tables that allows deeper exploration and summarization. For more rigorous analysis, MS-Excel offers add-ins and tools for statistical testing and modeling.

Eligibility Criteria

Passed HS(10+2) or its equivalent
(within last 5 years)

Award of Certificate

Completion Certificate will be awarded by **Vidyasagar University** to all the candidates, upon successful completion of the course.

Course Fees

Admission Fee: 200/-

Course Duration

Fifteen Days

Benefits from this Course

Upon successful completion of the course, students will possess a deep and practical understanding of the subject. The course combines lectures, hands-on projects, and practical exercises to impart comprehensive knowledge of key concepts, including real-world applications. Continuous assessments and evaluations ensure students' progress and readiness to address complex challenges in the field, equipping them for future endeavors with confidence and expertise.

Selection Procedure

Students from any stream are eligible for this course. However, since each batch can accommodate a maximum of 30 students, the selection process will consider various criteria in addition to academic marks.
