Waste Management Policy

Introduction

Tamralipta Mahavidyalaya is committed to minimizing waste generation and reducing environmental deterioration and pollution. Our aim is to provide a fresh and eco-friendly environment for all members of our institution. This Waste Management Policy is based on the core principles of waste supervision, which include reducing, reusing, recycling, and recovering waste products. All individuals within the college are encouraged to reduce waste creation, and the institution has established a mechanism for re-use waste as bio-fertilizers.

Policy Guidelines

The college's Waste Management Policy is guided by the following principles:

- Enhancing environmental consciousness among students and staff.
- Preventing pollution and minimizing waste generation.
- Taking intelligent measures and well behaved practice to reduce waste.
- Promoting green practices and sustainable growth.

Action Plans

Tamralipta Mahavidyalaya has adopted specific action plans for managing various types of waste:

a. *Paper Waste*

Implement paper-saving initiatives.

Encourage digital documentation and communication.

Promote double-sided printing.

b. *Solid Waste*

Implement waste segregation at source.

Utilize vermicomposting for biodegradable waste.

Encourage projects (ENVS) related to sustainable development among students.

c. ***Non-Biodegradable Waste***

Hand over non-biodegradable waste to scrap dealers for recycling.

Promote reusable glasses and cloth bags.

Minimize plastic usage for student projects and food containers.

d. ***Liquid Waste***

Utilize hand washing water for plant irrigation.

Channel washroom water into specially made pits connected to our own pond.

e. ***E-waste***

Implement a buy-back policy for electronic gadgets.

Donate outdated and unused electronic devices to the school or other needy.

We believe that by minimizing waste generation and promoting sustainable practices, we can contribute to a healthier environment and inspire environmental awareness among all members of our institution. Together, we can make a significant impact on waste reduction and sustainable growth.
